

InspectWorks™

Improving Public Housing through Inspections

InspectWorks™, Mobizent's mobile in-field general Inspection solution provides an automated method to consistently and effectively collect and maintain Housing inspections

InspectWorks™, Mobizent's innovative mobile inspection solution, is revolutionizing the way inspection companies and Housing Authorities perform inspection, such as building, electrical, plumbing and much more.

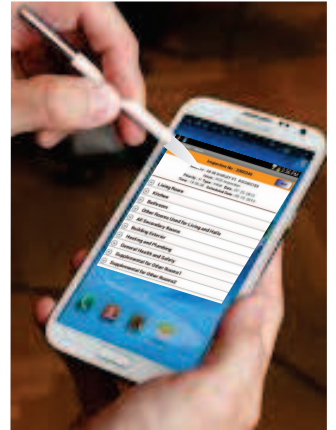

With InspectWorks™, inspectors can perform field inspections electronically, eliminating the need for paper forms, clipboards and avoid re-entry of data. In addition to standard data capture, InspectWorks™ provides the ability to capture drawings, pictures or photos including employee and customer signatures. InspectWorks™ eliminates the need to remember complex codes, laws and bylaws etc. by automating the entire task with pull-downs and online searches.

Field inspectors can synchronize remotely using wireless technology or using the standard synchronizing methods at the office. InspectWorks™ provides the ability to review or lookup previous inspections on demand and standardizing the way an inspection report is written. It also

provides the management and control of properties to meet new HUD requirements for property management. The solution not only provides the handheld mobile front-end solution but also provides a complete and feature rich back-office solution to

manage the inspections. Inspections can have approval cycles and roll-up reports to meet the critical time-based HUD requirements for any type of Section 8, HQS, UPCS or General Inspection for each property. Designed to run on most Mobile Devices, including smartphones, and tablets, InspectWorks™ provides highly sophisticated service modules that intelligently work together to allow users to monitor and control inspections, from a call center solution to scheduling and mapping locations needed for maintenance and inspection personnel.

InspectWorks™ is a cost-effective solution that reduces the amount of time spent on manual inspections and manual reporting by allowing users to capture all the required information and approvals on the electronic device or website.

InspectWorks™ ensures that the entire inspection process is streamlined, from the initial entry of the information through the reporting and data collection analysis, to ensure that Housing Authorities save time and money.

Features of InspectWorks:

- » Integrated HQS, UPCS required fields
- » Capture voice recordings
- » Embed photographs & sketches
- » Easy entry from multiple devices
- » Full reporting and exporting abilities
- » Advanced security features (signature validation)
- » Customizable to authorities requirements

Benefits of InspectWorks:

- » Simplifies and streamlines inspection management
- » Reduces errors, re-work and paperwork
- » Reduces carbon footprint
- » Ensures data integrity, data analysis and visualization
- » Increases productivity
- » Integrates with department network
